Dear Hiring Manager,

I am excited to apply for the Software Engineer / Front-End Developer position. With over a decade of experience in full-stack development, UI/UX design, and mobile app development, I have a proven track record of enhancing end-user experiences across digital platforms.

Currently, at Minibeast Enterprises, I have led the development of a hybrid mobile and web app using Flutter, Cordova, ReactJS, PHP, and MySQL. My role includes server administration, automated maintenance, and API integrations. At Our Town America, I have developed AI-powered assistants, multiple hybrid mobile web apps, and advanced mapping software. My projects emphasize efficiency, scalability, and intuitive user experiences.

Beyond my professional experience, I have independently developed various open-source projects, including a functional in-browser Finder clone, a Markdown parser, and a CRM system integrating Twilio and HelloSign APIs. My expertise spans JavaScript, PHP, SQL, Linux, Flutter, ReactJS, and more.

I am eager to bring my technical expertise, problem-solving skills, and passion for innovation to your team. I welcome the opportunity to discuss how my skills align with your company's goals.

Sincerely,

Robert Parham
