

Dear Hiring Manager,

I am excited to apply for the Software Engineer position at Skanska USA Inc. With a deep background in full-stack development and a passion for enhancing user experiences, I am eager to contribute my technical expertise and innovative approach to your team.

In my role at MiniBeast Enterprises, I developed and managed hybrid mobile and web applications using Flutter, Cordova, ReactJS, PHP, MySQL, and Bash. Additionally, I structured cloud-based content management systems and automated server maintenance tasks. At Our Town America, I have spearheaded the development of client-facing and internal applications, leveraging LLMs for AI-driven solutions and creating interactive mapping software to visualize demographic data. My ability to translate user stories into functional prototypes and optimize UI/UX design aligns perfectly with the needs of your team.

With expertise in JavaScript, PHP, Apache, MySQL, PostgreSQL, and a broad range of modern technologies, I am confident in my ability to drive innovation at Our Town America. I would welcome the opportunity to discuss how my skills and experience can contribute to your company's success.

Best regards,

Robert Parham
