Professional Summary

Passionate Software Engineer with over a decade of experience working with multiple programming languages and frameworks. From an early age, I have enjoyed coding and hacking, driven by an enthusiasm for learning new technologies and solving complex problems. I am committed to writing clean, scalable, and efficient code, with a focus on building robust systems and delivering impactful user experiences.

Professional Experience

MINIBEAST ENTERPRISES | Software Engineer

Orlando, FL | October 2021 – January 2025

Innovated hybrid mobile and web apps using Flutter, Cordova, ReactJS, PHP, MySQL, and Bash.

Managed and programmed Linux/Apache servers on Digital Ocean.

Structured S3 content management systems and automated backups.

Designed social groups with features like body fat calculators and guided workouts with videos.

OUR TOWN AMERICA | Software Engineer

Clearwater, FL | June 2015 – Present

Developed an AI assistant leveraging LLMs for internal operations.

Created iterative UI/UX prototypes and conducted user testing.

Maintained multiple client-facing mobile web apps using Cordova.

Built mapping software for demographic data visualization.

Generated CRM software utilizing Twilio and HelloSign APIs.

CARNET MARKETING & CUSTOMER TRACK | Product Manager

Safety Harbor, FL | June 2010 – June 2015

Designed and launched proprietary enterprise CRM with PHP and MySQL.

Developed Call Center dialer software using Twilio, PHP, and JavaScript.

Managed Linux/Apache server infrastructure.

WESTBAY SOFTWARE LLC | Owner / Developer

Tampa Bay, FL | January 2005 – Present

Created hybrid mobile apps and call routing software via Twilio.

Developed sales and marketing referral apps for client businesses.

Provided IT maintenance and troubleshooting for various clients.

Education

Western Governor's University | B.Sc. in Software Engineering

St. Petersburg College | B.Sc. in Computer Science (incomplete)

Pinellas Technical Institute | Web Design Principles | 2007
